

Playwright Notes For Demo Web Shop Capstone

Notes for the final trainer-style project structure

What Changed

The project now uses a Page Object Model layout. Test cases are visible in module folders under tests, and shared browser/page object setup is handled through fixtures/baseFixture.js.

Folder Meaning

Folder/File	Meaning
.github/workflows/allure-report.yml	CI/CD workflow for Playwright, Allure, and GitHub Pages.
api/apiClient.js	Reusable API helper kept for trainer-style project structure.
data/demoWebShopData.js	Project data such as base URL, service coverage, and browser list.
docs/	Project plan, schedule, and Playwright notes.
fixtures/baseFixture.js	Custom Playwright fixture that provides all page objects to tests.
pages/base.page.js	Common navigation and assertion helper methods.
pages/*.page.js	Service-wise Page Object Model classes.
screenshots/	Folder reserved for report screenshots or evidence.
tests/**/*.spec.js	Visible service-wise test cases. There are 120 spec files.
playwright.config.js	Browser projects, base URL, reporters, timeouts, and retry settings.

How One Test Works

- Open a file inside tests/.
- It imports test from fixtures/baseFixture.js.
- The fixture gives the test a page object like authenticationPage or cartPage.
- The test calls a method from the page object.
- The page object uses common methods from base.page.js to navigate and assert.

Coverage

Service	Cases	Test Folder	Page Object
Authentication	15	tests/authentication	authentication.page.js

Service	Cases	Test Folder	Page Object
Product and Search	15	tests/product	product.page.js
Cart	15	tests/cart	cart.page.js
Wishlist and Compare	15	tests/wishlist-compare	wishlistCompare.page.js
User Profile and Account	15	tests/user-profile	userProfile.page.js
Address and Shipping	15	tests/address-shipping	addressShipping.page.js
Checkout and Payment	15	tests/checkout-payment	checkoutPayment.page.js
Customer Support and Information	15	tests/customer-support	customerSupport.page.js

Current Result

Item	Result
Website	Demo Web Shop
Functional tests	120
Browser projects	Chromium, Firefox, WebKit
Total executions	360
Status	360 passed, 0 failed, 0 skipped
